DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a composition comprising a glandular agent, a kelp derivative and a pituitary extract etc, classified in class 424, subclass 195.17, for example

II. Claims 10-18, drawn to a method of increasing breast size in a subject comprising administering the composition, classified in class 424, subclass 565, for example.

2. The inventions are distinct from each other because of the following reasons:

Inventions I and II are related as product (i.e. I) and process of use (i.e. II). The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). In the instant case, the product as claimed (i.e. a kelp derivative obtained from bladder wrack) can be used in a materially different process of using that product such as for the treatment of skin disorders (e.g. Kasai et al. US 6800789 column 5 lines 57-66).

3. The several inventions above are independent and distinct, each from the other.

They have acquired a separate status in the art as separate subject for inventive effect

and require independent searches. The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all the above inventions in one application.

Furthermore, for claims 1-18, applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

For claims 1-18 the claimed species are:

a) Fenugreek b) Saw Palmetto c) Mexican Wild Yam d) Fennel e) Dong Quai
Damiana f) Blessed thistle g) L-Tyrosine h) Mothers Wort i) Black Cohosh j) Oat Grass
k) Hops Flower

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the list of a-k above for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a)

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirements be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randall Winston whose telephone number is 571-272-0972. The examiner can normally be reached on 8AM-5PM.
